Be sure to visit www.kregtool.com to get all the details surrounding our entire product line.

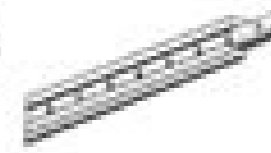

Perfect Miter Attachment - KMS7511

This attachment to the Kreg stops references a 45 degree mitered board on two surfaces, greatly increasing the cutting accuracy and repeatability of the mitered cut. Great for picture framing.

Miter Track - KMS7506

Miter Track can be used to produce countless types of woodshop join and features such as taper join, cutoff joints, and more. Bottom of track accepts a 1/2" wide measuring tape to increase accuracy. Track will capture the head of any 1/4" hex bolt 3/8" in a 4" length with tape. Easy cut to length with a hacksaw.

Track Clamp - KMS7511

This inexpensive and versatile clamp works great in a variety of applications. Fits the Miter Track, Top Rail or HD Rail. For most clamping applications, we suggest using two clamps to keep the work piece from rotating.

Precision Band Saw Fence - KMS7200

Introduce a new level of accuracy to your band saw with our Precision Band Saw Fence. We've designed this fence with non-slip feet and expert Mark Dugan's to produce an unprecedented level of rigidity, adjustability and precision. The fence is adjustable in two dimensions for ease in setting it parallel to the blade. Cutting accuracy and repeatability is further enhanced by the precision lens carrier that reads off of the included scale.

Precision Miter Gauge System - KMS7102

Cut perfect miters consistently with the Precision Miter Gauge System. Features factory calibrated accuracy from a gauge head that is machined on a computerized milling machine. A 3/8" Heavy Duty Teflon section with patented FlexStop and self-adhesive measuring tape is included.

Kreg Precision Measuring Systems Kit

INSTRUCTIONAL MANUAL

The Blue Mark of Quality.

The **Kreg Precision Measuring Systems Kit** contains all the necessary hardware to add a new level of accuracy to your woodworking equipment. Whether you are adding a new set of support tables for your **Miter Saw** or replacing the fence on your **Radial Arm Saw**, the unique design of the Top Rail included in this kit attaches to the fence portion of your set-up to provide a calibrated system that will eliminate the need to measure and mark material prior to cutting. These same parts, coming with a stop-rod, **DR Press** (used to provide a repeatable system that will greatly reduce the time required to build multiple parts or cabinet components).

The **Production Stop** provides a "lock-rod" index point to make one cut, or a thousand cuts, exactly the length desired. The unique design of the stop allows the user to simply lift it from one side of the saw blade or bring it and move it to the other without the fuss of moving it to the end of a track.

The **FlexStop** features a "self-releasing" arm that rises over a board to allow for quick breaching of the end without repositioning the stop. The same feature proves valuable on the Dr Press for multiple stop set-ups.

Each stop has an integral **Reading Cursor** that combines with the **Self-Adhesive Measuring Tapes** to provide precise cuts until now only seen on high quality tape saws. (Use the pictures on these pages to provide a guide to create the perfect Precision Measuring System for your woodworking equipment.)
